

PRAVINS - RING SIZE ESTIMATOR

Introduction

If you would like to estimate the size of an existing ring but are not able to visit us, please use the indicative ring sizes as shown below. Please note this page is provided as a guide only - the most accurate method to verify the size of an existing ring or your finger is to visit a Pravins store.

Instructions

1. Print this page on A4 paper. To ensure you do not allow the software to scale the print-out, be sure to select 'Actual Size' in the Print Options dialogue box.
2. Check the print scale, the line below should measure 5cm exactly when this page is printed properly.

3. Place the ring to be measured over the circles below.
4. Find the circle which completely fills the inside of the ring without overlapping. The size of the ring is the letter shown within the circle.
